

REMARKS

Claim 1, for example, calls for implementing error correction "depending on the density of data storage." The error correction in the cited reference does not depend on the density of data storage. It is the same regardless of the density of data storage. As the Examiner concedes, no matter what the data storage density is, the error correction used is the same. Therefore, it does not depend on the density of data storage.

Therefore, reconsideration is respectfully requested.

Respectfully submitted,

Date: November 7, 2006
